Dear Medicare Provider:

The Centers for Medicare & Medicaid Services (CMS) strives to protect the Medicare Trust Fund and effectively manage Medicare resources. To support these goals, CMS has contracted with eGlobalTech, a professional services firm in Arlington, VA, to develop Comparative Billing Reports (CBRs). CBRs provide comparative data on how an individual health care provider’s billing and payment patterns for selected topics compare to his/her peers. The CBRs give providers an opportunity to compare themselves to their peers, check their records against data in CMS’ files, and review Medicare guidelines to ensure compliance. CBRs are for educational and comparison purposes and do not indicate the identification of overpayments. Please note, no reply is necessary.

Attached is a CBR that reflects your billing or referral patterns compared to peer providers’ patterns for the same services in your state and nationwide. We recognize that practice patterns can vary by region, subspecialty, and patient acuity levels, which are elements that are not evident in the claims data reviewed for the CBR. We hope you find this CBR beneficial as an educational tool to assist you in identifying opportunities for improvement. If you have any questions regarding this CBR, or if you want to change the way you receive CBRs in the future, please contact the CBR Support Help Desk.

- Toll Free Number: 1-800-771-4430
- Email: cbrsupport@eglobaltech.com
- Website: [http://www.cbrinfo.net](http://www.cbrinfo.net)

REMINDER: If you have changed your mailing address or contact information and have not notified the National Plan and Provider Enumeration System (NPPES) and/or CMS’ provider enrollment contractor via the internet or the appropriate Medicare enrollment application, please take time to review and update the system.

You can update your National Provider Identifier (NPI) contact information in NPPES at [https://nppes.cms.hhs.gov/NPPES](https://nppes.cms.hhs.gov/NPPES). If you have forgotten your User ID and/or password or need assistance, contact the NPI Enumerator at 1-800-465-3203 or email customerservice@npienumerator.com.

We hope you find the attached report informative.

Sincerely,

Susan M. Goodrich
CBR Project Director
eGlobalTech

Enclosure
Introduction
This CBR focuses on internists who submitted claims for established patient evaluation and management (E/M) services appended with modifier 25. The CPT® 2014 Professional Edition manual defines modifier 25 as indicative of a “significant, separately identifiable E/M service by the same physician or other qualified health professional on the same day of the procedure or other service.” In 2005, the Office of the Inspector General (OIG) released a report on Medicare payments for E/M services billed with modifier 25. The report, “Use of Modifier 25” (OEI-07-03-00470), indicated that out of $1.96 billion paid for claims using modifier 25, as much as $538 million was paid improperly. The OIG found that many providers appended the modifier to more than 50 percent of the services they billed, while other providers used modifier 25 on their E/M services when no other services were performed on the same day. Of the 431 claims audited, 35 percent did not meet program requirements.

CPT® codes and descriptors are copyright 2014/2015 American Medical Association. All rights reserved. Applicable FARS/DFARS apply.

The metrics reviewed in this report are:
- Percentage of services with modifier 25 appended
- Average allowed minutes per visit for claim lines with modifier 25 and without modifier 25
- Average allowed charges per beneficiary summed for the one-year period, regardless of the modifiers appended to the claim lines

Coverage and Documentation Overview
This portion of the CBR offers a broad look at the coverage and documentation requirements to ensure compliance with Medicare guidelines. The information provided does not supersede or alter the coverage and documentation policies as outlined in the Medicare Administrative Contractor (MAC) Local Coverage Determinations (LCDs) and Local Coverage Articles (LCAs). Please refer any specific questions you may have to the MAC for your region.

Basic Coverage Criteria
The CPT® manual describes a modifier as providing “the means to report or indicate that a service or procedure that has been performed has been altered by some specific circumstance but has not changed in its definition or code.” Procedure codes may be modified in certain situations to more
precisely describe the service or item rendered.

According to Chapter I of the National Correct Coding Initiative (NCCI) Policy Manual, the use of modifier 25 applies to E/Ms performed on the same day as a minor procedure, those services with a global period of 10 days or less. The modifier is also used with E/Ms performed on the same date as services such as x-rays and injections.

Per NCCI, “In general E/M services on the same date of service as the minor surgical procedure are included in the payment for the procedure. The decision to perform a minor surgical procedure is included in the payment for the minor surgical procedure and should not be reported separately as an E/M service. However, a significant and separately identifiable E/M service unrelated to the decision to perform the minor surgical procedure is separately reportable with modifier 25.” Services related to the decision to perform the procedure could include assessing the patient before, during, and after the procedure, informing the patient of possible risks and giving the patient instructions for post-operative care. According to CPT® Assistant, assessing the site, explaining the procedure, and obtaining informed consent are all services which are necessary for the performance of a medical procedure and are included in Medicare payments for the procedure.

The NCCI Policy Manual, Chapter I, Section E, states the following regarding the Healthcare Common Procedure Coding System (HCPCS): “Modifiers may be appended to HCPCS/CPT codes only if the clinical circumstances justify the use of the modifier. A modifier should not be appended to a HCPCS/CPT code solely to bypass an NCCI edit if the clinical circumstances do not justify its use.”

According to Chapter 12 of the Medicare Claims Processing Manual, a significant, separately identifiable E/M service may be billed in addition to an Initial Preventive Physical Examination (IPPE) or an Annual Wellness Visit (AWV). Modifier 25 should be appended to the medically necessary E/M service. Using this modifier identifies the E/M as significant from the IPPE or AWV code. The instructions go on to note the following: “Some of the components of a medically necessary E/M service (e.g., a portion of the history or physical exam portion) may have been part of the IPPE or AWV and should not be included when determining the most appropriate level of E/M service to be billed for the medically necessary, separately identifiable, E/M service.”

The separately billed E/M code must meet documentation requirements for the level selected. Information on selecting the proper level of E/M code can be found in Chapter 12, Section 30.6.1 of the Medicare Claims Processing Manual. The manual states, “Medical necessity of a service is the overarching criterion for payment in addition to the individual requirements of a CPT code. It would not be medically necessary or appropriate to bill a higher level of evaluation and management service when a lower level of service is warranted. The volume of documentation should not be the primary influence upon which a specific level of service is billed.”

The problem addressed must be distinct from the procedure and significant enough to warrant some kind of treatment by the physician. None of the E/M services’ documentation components may be used to support the performance of the procedure. Providers can audit their own medical records to determine if they meet the requirements by using a marker to eliminate the documentation for the procedure or other services (including any related E/M service) from the note. The remaining documentation should be enough to support a significant level of service.

According to the American College of Physicians’ ACP Internist® article “Learn Proper Coding
for Modifiers 59 and 25,” documentation must be extensive enough that the additional service is readily identifiable to auditors who might review the claim. The article states, “The E/M service must require additional history, exam, knowledge, skill, work, time, and/or risk above and beyond what is usually required for the procedure, and these must be included in the documentation.”

Method
This report is an analysis of Medicare Part B claims with allowed services for the CPT® codes listed in Table 1 with dates of service from October 1, 2014 to September 30, 2015 and includes only those claims where the rendering NPI specialty is denoted as internal medicine (11). This analysis was based on the latest version of claims available from the Integrated Data Repository (IDR), as of January 7, 2016. Your percentages and averages denoted in Tables 3-5 are calculated from the data supplied from your utilization of the E/M CPT® codes in Table 2 using the formulas below. Your values are compared to your state (CO) and national values, using either the chi-squared or t-test at the alpha value of 0.05.

Percentage of Services with Modifier 25
The percentage of services with modifier 25 is calculated as follows:

\[
\left( \frac{\text{Number of Services with Modifier 25}}{\text{Total Number of Services}} \right) \times 100
\]

Average Allowed Minutes per Visit with Modifier 25 and without Modifier 25
Each CPT® code is assigned a value that corresponds to the typical minutes described in the CPT® code description in Table 1. This value is multiplied by the total allowed services for this code to arrive at the total weighted services per code. All weighted services are summed by modifier designation (with modifier 25 and without modifier 25) and divided by the total number of visits by modifier designation. A visit is defined as a single date of service by beneficiary. Generally, the total number of visits is equal to the total number of services by modifier designation. However, if multiple E/M services are allowed for a particular beneficiary and date of service, then these services would be combined in the same visit. The average minutes allowed per visit are calculated separately for services with modifier 25 and without modifier 25 as follows:

\[
\frac{\text{Total E/M Weighted Services by Modifier Designation}}{\text{Total Number of E/M Visits by Modifier Designation}}
\]

Average Allowed Charges per Beneficiary
The average allowed charges, regardless of the modifiers, per beneficiary is calculated for the one-year period as follows:

\[
\frac{\text{Total Allowed Charges}}{\text{Total Number of Beneficiaries}}
\]
Comparison Outcomes
There are four possible outcomes for the comparisons between the provider and the peer groups:

- **Significantly Higher** - Provider’s value is higher than the peer value, and the statistical test confirms a significance
- **Higher** - Provider’s value is higher than the peer value, but either the statistical test does not confirm a significance or there is insufficient data for comparison
- **Does Not Exceed** - Provider’s value is not higher than the peer value
- **N/A** - Provider does not have data for comparison

The statistical test (chi-square or t-test) used in each analysis can be identified from the following tables. These tests give the provider the benefit of the doubt since significance is based on the total number of services and/or beneficiaries, as well as the variability of those values.

Results
Table 2 provides a summary of your utilization of the CPT® codes and modifiers included in this CBR. The total allowed charges, allowed services, and distinct beneficiary count are included for each CPT® code, both with and without modifier 25.

<table>
<thead>
<tr>

<td></td>
<td><strong>$176,351.30</strong></td>
<td><strong>2,125</strong></td>
<td><strong>436</strong></td>
</tr>
</tbody>
</table>

Please note, the totals may not be equal to the sum of the rows. The number of beneficiaries is an unduplicated count for each row and the total. Since it is likely that a beneficiary would have billings for more than one CPT® code and modifier type, he/she would be counted in the beneficiary count in each applicable row. However, this beneficiary would be counted only once in the total.
Table 3 provides a comparison of your percentage of services with modifier 25 to that of your state and the nation.

<table>
<thead>
<tr>
<th>Type</th>

The Next Steps
We encourage you to check with your MAC to ensure you meet Medicare standards for your jurisdiction. Please use the above references and resources as a guide.

You are invited to join us for one of the CBR201603 webinars on March 16, 2016 or March 30, 2016 from 3:00 - 4:30 PM ET. Space is limited, so please register early. To attend either webinar, register online at www.cbrinfo.net/cbr201603-webinar.html.

If you are unable to attend, you may access a recording of the webinar five business days following the event at the website above.

For detailed links to information listed in the references and resources section, visit: http://www.cbrinfo.net/cbr201603-recommended-links.html

If you have any questions or suggestions relating to this CBR, please contact the CBR Support Help Desk via email at CBRSupport@eglobaltech.com or via telephone at (800) 771-4430.
